

July 9, 2026

Dear Patients,

I wanted to personally share some exciting news with you.

After much thought and planning, our practice is changing its name from **Frederick Center for Dentistry** to **Veritas Dental Institute**.

This decision reflects how our practice has grown over the years and our vision for the future. As we continue to expand the services we offer and align our locations under one unified identity, we wanted a name that better represents the comprehensive, modern dental care we provide. The name **Veritas**, meaning "truth," reflects the values that guide us every day—honesty, excellence, trust, and putting our patients first.

While our name is changing, the most important things are staying exactly the same.

The doctors, hygienists, assistants, and administrative team you know and trust will still be here to care for you. There is **no change in ownership, leadership, or staff**. You will continue to receive the same personalized attention, clinical excellence, and compassionate care that have always been the foundation of our practice.

I am incredibly grateful for the relationships we have built with our patients and families over the years. Your trust means everything to us, and it has allowed us to grow into the practice we are today. This rebranding is simply the next step in our journey—a way to better reflect who we are and where we are headed while maintaining the same commitment to serving our community.

In the coming months, you will begin to see our new name and branding on our website, office signage, communications, and other materials. Rest assured that your appointments, records, insurance information, and treatment plans will continue without interruption.

On behalf of myself and our entire team, thank you for allowing us to be part of your healthcare journey. We are honored by your trust and look forward to caring for you and your family for many years to come.

With gratitude,

**Dr. Sahil Goyal and the Team at Veritas Dental Institute**  
Formerly Frederick Center for Dentistry
